The Electric Car Company of Long Beach

June 2016

Introducing the MOKE Electric Vehicle

The Electric Car Company of Long Beach has brought a fascinating new vehicle to our current selection. Originally designed as a light military EV with a Jeep-like resemblance, the MOKE has been re-made as a contemporary NEV with a nostalgic look and feel. Designed by the same well-known manufacturers that make the Mini Cooper, the Moke has been scaled down and electrified by ACG, one of ECARCO's premier EV partners. It includes standard features such as 13-Inch Alloy Wheels, All-Steel Unibody, Headlights & Taillights, Turn Signals and Safety Side Reflex. It is the highest quality, most affordable and most noticeable NEV available today. If you enjoy a classic style accompanied by modern technology and strength, this is a great fit for you! Call ECARCO for more information today.

Our Top-Rated Service

Our Service and Repair business has been heating up! We fix all makes and models of EVs and offer a full array of Service & Repair solutions to suit your needs. Our experienced team of technicians pride themselves on providing you with the best service. Take advantage of our special repair incentives including Free Local Pick Up, Free Diagnostics and Competitive Repair Pricing. We'll have your EV running like new!

Solar Car Ports

Working together with renewable energy experts and solar developers, Solar Planet and ECARCO have now implemented a full line of carports specifically designed for Solar applications. Solar carports let you take full advantage of large parking areas for the purpose of producing electricity while providing shaded or covered parking to every day users. To make it easy, we can simplify your carport project by configuring one of our solar ready carport styles or provide design services to develop a custom solar carport solution for your next renewable energy project. Call or e-mail us today to begin your free consultation.
